The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies arent required to allow competitors access to the market. Im also concerned about the Commissions move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

Robert L. Carr

Subject: Comments to the Commissioner

Robert OBrien (robrien@ipta.com) writes:

In support of the UNE-P, I have one question. How long did it take **MCI**, Sprint and the other long distance carriers to establish a firm market share with their own facilities? I think **MCI** has been around for 20 years.

The local exchange has only been open to competition for approximately one year. It seems extraordinary that some feel that local service competition should be created in that year.

Please support the UNE-P

Sincerely,

Robert OBrien

As a worker in the telephone industry I have seen first hand that deregulation of tele phone service does not lower rates or improve service to consumers. It does however, cause more confusion for customers and a lack of responsibility by service providers as they point fingers at each other when there is a service problem and no one wants to take the blame. This only hurts the consumer.

I urge you to use your political power to work against deregulation of local phone service.

Sincerely,

Ronald L. Wiley
